MANAGEMENT DISCUSSION AND ANALYSIS

Global Economy

After rebounding to an estimated 5.5 percent in 2021, global growth is expected to decelerate markedly to 4.1 percent in 2022, reflecting continued COVID-19 flare-ups, diminished fiscal support, and lingering supply bottlenecks. The near-term outlook for global growth is somewhat weaker, and for global inflation notably higher, than previously envisioned, owing to pandemic resurgence, higher food and energy prices, and more pernicious supply disruptions. Global growth is projected to soften further to 3.2 percent in 2023, as pent-up demand wanes and supportive macroeconomic policies continue to be un-wound. Although output and investment in advanced economies are projected to return to pre-pandemic trends next year, in emerging market and developing economies (EMDEs)—particularly in small states and fragile and conflict-afflicted countries—they will remain markedly below, owing to lower vaccination rates, tighter fiscal and monetary policies, and more persistent scarring from the pandemic.

Global COVID-19 infection rates have soared, driven by the rapid spread of the Omicron variant. Advanced economies and a growing number of EMDEs have fully vaccinated a majority of their populations. But despite expansive vaccine coverage, some countries have been forced to reintroduce strict lockdown measures recently to alleviate acute pressures on their health systems. Vaccine coverage remains highly uneven around the world, and stubbornly limited across low income countries (LICs). At recent vaccination rates, only about a third of the LIC population will have received even one vaccine dose by the end of 2023.

The war in Ukraine has triggered a costly humanitarian crisis that demands a peaceful resolution. At the same time, economic damage from the conflict will contribute to a significant slowdown in global growth in 2022 and add to inflation. Fuel and food prices have increased rapidly, hitting vulnerable populations in low-income countries hardest. Global growth is projected to slow from an estimated 6.1 percent in 2021 to 3.6 percent in 2022 and 2023. This is 0.8 and 0.2 percentage points lower for 2022 and 2023 than projected in January. Beyond 2023, global growth is forecast to decline to about 3.3 percent over the medium term. War-induced commodity price increases and broadening price pressures have led to 2022 inflation projections of 5.7 percent in advanced economies and 8.7 percent in emerging market and developing economies—1.8 and 2.8 percentage points higher than projected last January. Multilateral efforts to respond to the humanitarian crisis, prevent further economic fragmentation, maintain global liquidity, manage debt distress, tackle climate change, and end the pandemic are essential.

Coal prices have experienced eight troughs since 1970. The troughs have mainly been associated with global recessions, the emergence of new producers, and policy-driven changes in China’s growth strategy involving a shift toward services and less energy-intensive consumption.

Growth in South Asia Region is projected to accelerate to 7.6 percent in 2022, as pandemic-related disruptions fade, before slowing to 6.0 percent in 2023. Returning demand is expected to drive a strong rebound in imports and gradually widen the region’s current account deficit. Despite the upward revision to growth, output in 2023 is still expected to be almost 8 percent smaller than the level of output projected for 2023 prior to the pandemic. In the subregion excluding India, output in 2023 is now expected to be around 4 percent below pre-pandemic projections. In India, the economic

MANAGEMENT DISCUSSION AND ANALYSIS

damage caused by the second wave has already been unwound with output effectively back to levels reached prior to the pandemic (2019Q4) as COVID-19 cases and restrictions subsided.

Indian Economy

- Following a contraction of 7.3% in 2020-21, the Indian economy is expected to grow by 9.2% in real terms in 2021-22 (according to initial advanced projections).
- GDP is expected to grow in real terms by 8-8.5% in 2022-23.
- The coming year is expected to see an increase in private sector investment with the financial system in strong shape to support the country's economic recovery.
- The projection is equivalent to the World Bank's and Asian Development Bank's recent predictions of 8.7% and 7.5% real GDP growth for 2022-23, respectively.
- According to the IMF's latest World Economic Outlook projections, India's real GDP will grow at 9% in 2021-22 and 2022-23, and 7.1% in 2023-2024, making it the world's fastest growing major economy for all three years.
- In 2021-22, agriculture and allied industries are predicted to grow by 3.9%, industry by 11.8%, and services by 8.2%.
- In 2021-22, demand for consumption is expected to increase by 7.0%, Gross Fixed Capital Formation (GFCF) by 15%, exports by 16.5%, and imports by 29.4%.
- Indicators of macroeconomic stability imply that the Indian economy is well positioned to meet the challenges of 2022-23.
- In 2022-23, a combination of large foreign exchange reserves, continued foreign direct investment, and expanding export revenues will provide an effective cushion against a potential global liquidity withdrawal.
- The "second wave's" economic effect was significantly less than the full lockdown in 2020-21, but the health consequences were far more severe.
- The Indian government's unique reaction included safety-nets to soften the impact on vulnerable sectors of society and the business sector, a major increase in capital investment to promote growth, and supply-side reforms to ensure long-term expansion.
- In a climate of severe unpredictability, the government's flexible and multi-layered reaction is based in part of an "Agile" framework that employs feedback loops and the usage of 80 High Frequency Indicators (HFIs).

Global Textile Industry

The global textile market size is expected to grow from \$530.97 billion in 2021 to \$575.06 billion in 2022 at a compound annual growth rate (CAGR) of 8.3%. The textiles market is expected to grow to \$760.21 billion in 2026 at a CAGR of 7.2%.

Increasing demand for online shopping is expected to drive the textile manufacturing market. Manufacturers can now sell their

products on a larger platform than before, which will increase their customer base geographically driving the growth of the textile manufacturing market. In countries such as India, for instance, e-commerce portals have boosted the sales of traditional garments by giving larger exposure to producers who were confined to one geography.

The outbreak of the Coronavirus disease (COVID-19) has acted as a massive restraint on the textile manufacturing market in 2021 as supply chains were disrupted due to trade restrictions and consumption declined due to lockdowns imposed by governments globally. Steps by national governments to contain the transmission have resulted in halting of manufacturing activities and a decline in economic activity with countries entering a state of lockdown and the outbreak had a negative impact on businesses throughout 2021.

Advancements in wireless technologies and rising demand for connectivity is driving the demand for smart textiles. Smart textiles are fabrics capable of interacting with their environment. They have the ability to react to physical stimuli such as thermal, mechanical, electrical and chemical sources. Sensors, actuators and fabrics are the major components of smart textiles. The materials used in smart textiles include optical fibers, metals and conductive polymers. They are widely used in fashion, entertainment, medical, transportation, sports and fitness and military. For example, Cityzen Science's, d-shirt, has a wide range of functions such as heart rate monitor, built-in GPS, accelerometer, altimeter.

Asia Pacific was the largest region in the textile market in 2021. Western Europe was the second largest region in the textile market. The regions covered in the textile market report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, Africa.

Indian Textile Industry

MARKET SIZE

India's textiles industry has around 4.5 crore employed workers including 35.22 lakh handloom workers across the country. Exports of textiles (RMG of all textiles, cotton yarns/fabs/made-ups/handloom products, man-made yarns/fabs/made-ups, handicrafts excluding handmade carpets, carpets and jute mfg. including floor coverings) stood at US\$ 29.8 billion between April-December 2021.

India is the world's largest producer of cotton. Production stood at 360.13 lakh bales for the crop year October 2021-September 2022. Domestic consumption for the 2021-22 crop year is estimated to be at 335 lakh bales.

MANAGEMENT DISCUSSION AND ANALYSIS

Production of fibre in India reached 2.40 MT in FY21 (till January 2021), while that for yarn, the production stood at 4,762 million kgs during same period.

India's home textile exports grew at a healthy rate of 9% in FY21 despite the pandemic. In the year 2020-21, 1.13 million tonnes of cotton yarn were exported from India.

INVESTMENT

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 3.93 billion from April 2000-December 2021.

GOVERNMENT INITIATIVES

Indian government has come up with several export promotion policies for the textiles sector. It has also allowed 100% FDI in the sector under the automatic route. The ₹ 10,683 crore (US\$ 1.44 billion) PLI scheme is expected to be a major booster for the textile manufacturers. The scheme proposes to incentivise MMF (man-made fibre) apparel, MMF fabrics and 10 segments of technical textiles products.

Other Initiatives taken by Government of India are:

- Under the Union Budget 2022-23, the total allocation for the textile sector was ₹ 12,382 crore (US\$ 1.62 billion). Out of this, ₹133.83 crore (US\$ 17.5 million) is for Textile Cluster Development Scheme, ₹ 100 crore (US\$ 13.07 million) for National Technical Textiles Mission, and ₹ 15 crore (US\$ 1.96 million) each for PM Mega Integrated Textile Region and Apparel parks scheme and the Production Linked Incentive Scheme.
- In November 2021, Union Minister of Textiles, Commerce and Industry, Consumer Affairs & Food and Public Distribution, Mr. Piyush Goyal, stated the desire to target a 3-5x time increase in the export of technical textiles worth US\$ 10 billion over the next three years.
- The Indian government has notified uniform goods and services tax rate at 12% on man-made fabrics (MMF), MMF yarns, MMF fabrics and apparel, which came into effect from January 1, 2022.
- In October 2021, Union Minister for Commerce and Industry, Textiles, Consumer Affairs, Food & Public Distribution, Mr. Piyush Goyal, announced the creation of 100 textile machinery champions in the country and to promote it in the global market. Through this, the government aims to make India a global player in textiles machinery.
- In October 2021, the government introduced SAMARTH training at 75 training centers across the country, to accelerate the scheme's coverage among artisans.
- The government allocated funds worth ₹ 17,822 crore (US\$ 2.38 billion) between FY16 and FY22 for the 'Amended Technology Up-gradation Fund Scheme' (A-TUFS), to boost the Indian textile industry and enable ease of doing business.
- In July 2021, the government extended the Rebate of State and Central Taxes and Levies (RoSCTL) scheme for exports of apparel/garments and made ups until March 2021. This will help boost exports and enhance competitiveness in the labour-intensive textiles sector.
- Defence Research and Development Organisation (DRDO) is helping the Indian textile industry to produce yarns and eliminate dependence on import of Chinese and other foreign clothing for military uniforms. Indian defence sector has expressed support towards the Indian technical textile sector.

MANAGEMENT DISCUSSION AND ANALYSIS

Outlook: There is an immense growth potential in Indian textiles and apparel industry due to several reasons. One, revival of demand in India's major export destinations two, rising per capita income and disposable income in the country three, shift in demographics four, changing lifestyles five, increasing demand for quality products, six, increase in participation of women in workforce seven, increased penetration of the organised retail and eight, highly focused approach and favourable policy support of the Government; all are set to fuel the demand of various textile and apparel products in the coming future.

INCREASING PERIPHERY

Considering the point it is pleasure to announce that the Company is going to increase its periphery and start a new line of Business with Cotton Spinning project. A Capex Plan of the Company for installation of 29184 Cotton Spindles and Modernization of PV Spinning, Weaving and Processing divisions of the Company were approved during the year 2021-22. The approximate cost of Project will be ₹ 194 Crores to be funded by Term Loan and internal accruals.

SWOT Analysis

Having the second highest spindleage in the world, the spinning industry in India contributes to more than one-fourth of global trade of cotton yarn. Cotton textiles comprise more than 60 per cent of Indian textile exports.

Risks and Concerns

Risk management is embedded in your Company's operating framework. Your Company believes that managing risks helps in maximizing returns. The coronavirus situation has made risk management a priority in the textile industry. Through a comprehensive risk analysis, companies in this sector can understand their operations and risk exposure better.

1. COMPETITIVE RISK:

The apparel industry is subject to rapidly evolving fashion trends, and we must continuously offer innovative and upgraded products to maintain and grow our existing businesses. Investments in the industries have started picking up with no barriers for entry of new players. Your Company continues to focus on increasing its market share and focusing more on R&D, Quality, Cost and Timely delivery that help create differentiation and provide optimum service to its customers to expose competition risk.

2. FINANCIAL (FUNDING RISK):

Any increase in interest rate can affect the finance cost. The Company's policy is to borrow long term borrowing in Indian Rupee to avoid any rate variation risks. The Company

MANAGEMENT DISCUSSION AND ANALYSIS

has adopted a prudent and conservative risk mitigation strategy to minimize interest costs. The textile industry faces various financial risks, from having lenient payment terms to negotiating weak contracts. You must practice caution to ensure prompt payments for items delivered, which is possible through various strategies, including placing requirements for advanced payments, leveraging invoice factoring, seeking bank guarantees, and insuring trade credit. Furthermore, be sure to evaluate the risk scores of your current and potential customers to minimize the likelihood of non-payment.

3. FOREIGN EXCHANGE RISK:

Foreign exchange risks are quantified by identifying contractually committed future currency transactions. The Company's policy is to hedge all long term foreign exchange risk as well as short term exposures within the defined parameters. The long term foreign exchange liability is hedged and hedging reserve is maintained as per requirement of Ind-AS.

4. COMPLIANCE AND CONTROL RISK:

The evolution of the global regulatory environment has resulted into increased regulatory scrutiny that has raised the minimum standards to be maintained by BSL Limited. This signifies the alignment of corporate performance objectives, while ensuring compliance with regulatory requirements. The Company is regularly monitoring and reviews the changes in regulatory framework and also monitoring its compliance mechanism so as to ensure that instances of non-compliance do not occur.

5. RAW MATERIAL PRICE RISK:

The Company is exposed to the risk of raw material prices of Polyester, Viscose, P/V blended yarn, Silk and Wool. The Company hedges this risk by purchasing the required raw material at the time of booking of sales contracts. Also this risk is being managed by way of inventory management and forward booking.

6. HUMAN RESOURCES RISK:

Retaining the existing talent pool and attracting new manpower are major risks. The Company hedges this risk by setting benchmark of the best HR practices and carrying out necessary improvements to attract and retain the best talent. The Company has initiated various measures such as rollout of strategic talent management system, training and integration of learning activities.

INTERNAL CONTROL SYSTEMS & THEIR ADEQUACY

The Company has an Internal Control System, commensurate with the size, scale and complexity of its operations. The Company has an Internal Audit department with adequate experience and expertise in internal controls, operating system and procedures. In discharging their role and responsibilities, the department is supported by an external audit firm.

The Internal Audit Department reviews the adequacy of internal control system in the Company, its compliance with operating systems and laid down policies and procedures. Based on the report of internal audit function, process owners undertake corrective action in their respective areas and thereby strengthen the controls. Significant audit observations and corrective actions thereon are presented to the Audit Committee of the Board.

The Audit Committee of the Board of Directors actively reviews the adequacy and effectiveness of the internal control systems and suggests improvements to strengthen them. The Company has a robust Management Information System, which is an integral part of the control mechanism.

FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

This part has been discussed in Board's Report.

HUMAN RESOURCE AND INDUSTRIAL RELATION

The Company takes pride in the commitment, competence and dedication shown by its employees in all areas of business. The Company has a structured induction process and management development programs to upgrade skills of the employees. As at 31st March, 2022, 423 Staffs employed in the Company.

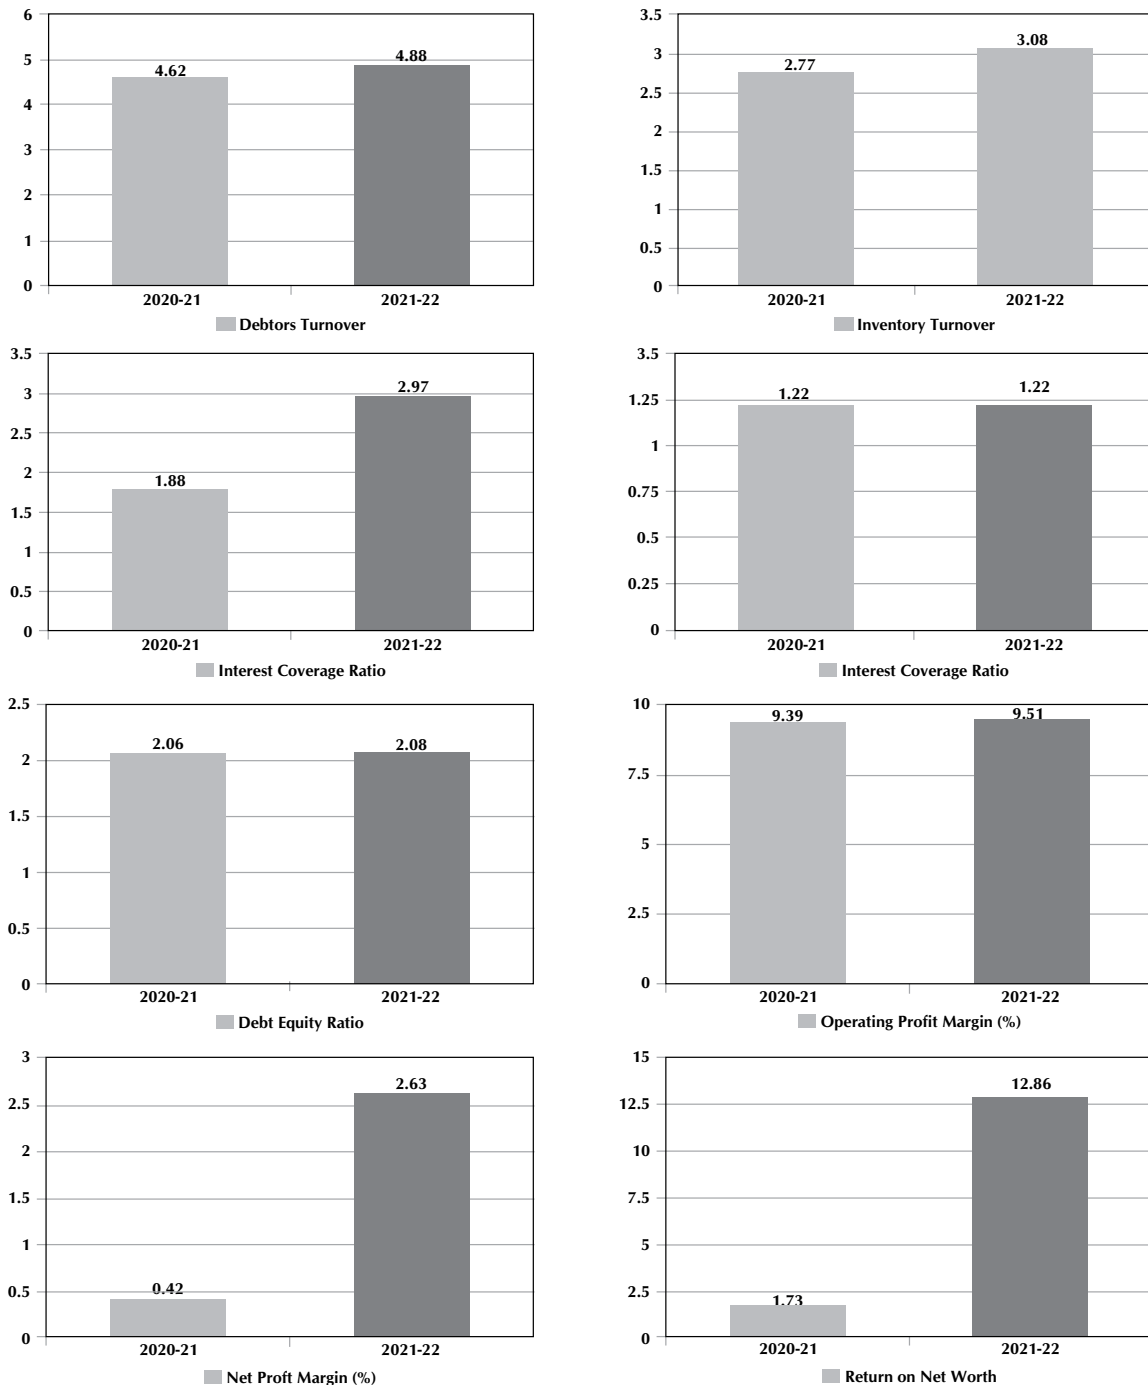

The Company's HR practices, systems and people development initiatives are focused on deployment and scouting for the "Best Fit" talent for all key roles. Pay for performance, reward and recognition programmes, job enrichment and lateral movements provide opportunity for growth & development of the talent pool.

The Company is committed to nurturing, enhancing and retaining top talent through superior Learning & Organization Development interventions. Corporate learning and Organization Development is a part of Corporate HR function. It is a critical pillar to support the organization growth and its sustainability over the long run.

CAUTIONARY STATEMENT

Statements in this report on Management Discussion and Analysis, describing the Company's objectives, projections, estimates, expectations or predictions may be forward looking, considering the applicable laws and regulations. These statements are based on certain assumptions and expectation of future events. Actual results could, however, differ materially from those expressed or implied. Important factors that could make a difference to the Company's operations include global and domestic demand-supply conditions, finished goods prices, raw materials costs and availability, fluctuations in exchange rates, changes in Government regulations and tax structure, economic developments within India and the countries with which the Company has business contacts. The Company assumes no responsibility in respect of the forward looking statements herein, which may undergo changes in future on the basis of subsequent developments, information or events.

MANAGEMENT DISCUSSION AND ANALYSIS

KEY FINANCIAL RATIO**Note:**

1. There is no Significant Changes (change of 25% or more) as compared to the previous financial year 2020-21 in Key Financial Ratio except Interest Coverage Ratio, Net Profit Margin and Return on Net worth.
2. The reason of such surging is that the Company achieved higher Turnover and higher Net Profit in the year 2021-22 as compared to the 2020-21.

वीगन सर्टिफिकेट: कंपनी दुनिया की कुछ टेक्सटाइल कंपनियों में से एक है, जिसके पास स्विट्जरलैंड की कंपनी से वीगन सर्टिफिकेट प्राप्त है।

पुनर्नवीनीकरण कच्चा माल: कंपनी ने वैश्विक स्थिरता आंदोलन के एक भाग के रूप में पुनर्नवीनीकरण पॉलिएस्टर स्टेपल फाइबर का उपयोग करने पर ध्यान केंद्रित किया है। वर्ष 2021-22 में, कंपनी की 60% फाइबर खपत पुनर्नवीनीकरण फाइबर की थी।

हरित-ईंधन: कंपनी का प्रोसेस हाउस डिवीजन शुरू से ही कोयले पर अपना बॉयलर और थर्मोपैक चला रहा है। वर्तमान में, ग्लोबल सरटेनेबिलिटी इनिशिएटिव्स के अनुरूप, बॉयलर और थर्मोपैक दोनों के लिए ईंधन प्रणाली को बदला जा रहा है। जुलाई 22 के बाद से, दोनों ऊर्जा प्रदाता सिस्टम जीवाश्म ईंधन के बजाय हरित (कृषि अवशेष) ईंधन पर काम करेंगे।

इस प्रकार, कंपनी निम्नलिखित कारणों से एक हरित कंपनी में परिवर्तित हो रही है:

ए) शून्य तरल निर्वहन।

ख) खतरनाक रसायनों के लिए जीरो निर्वहन।

ग) भाप और ऊष्मा उत्पादन में हरित -ईंधन का उपयोग।

क) नवीकरणीय स्रोतों द्वारा 20% से अधिक ऊर्जा

ई) पुनर्नवीनीकरण सिंथेटिक फाइबर का 50% से अधिक उपयोग।

ANNEXURE - II TO BOARD'S REPORT

Conservation of Energy, Technology Absorption and Foreign Exchange Earnings and Outgo:

The information on conservation of energy, technology absorption and foreign exchange earnings and outgo as per Section 134(3)(m) of the Companies Act, 2013 read with Rule 8 of the Companies (Accounts) Rules, 2014 is given here below and forms part of the Board's Report.

A. Conservation of Energy

Energy conservation dictates how efficiently a Company can conduct its operations. BSL has recognized the importance of energy conservation in decreasing the deleterious effects of global warming and climate change. The Company has undertaken various energy efficient practices. In line with the Company's commitment towards becoming an environment friendly organisation, all divisions continue with their efforts aimed at improving energy efficiency through improved operational and maintenance practices.

(i) The step taken or impact on conservation of energy:

- Total energy saved in Year 2021-22 due to energy conservation steps is 56100 Units in Spinning & Weaving division and 75900 Units in Process division.
- The impact of these energy conservation measures will be around 2.48 Lakhs Units in Spinning & Weaving division and 1.11 Lakhs Units in Process division in the year 2022-23.

(ii) The steps taken by the Company for utilizing alternate source of energy:

- Management decided to replace existing 8 Ton coal based boiler with 10 Ton Husk fired boiler of IBL make for utilizing alternate source of energy with 315 KW turbine which will produce around 12.5 Lakhs unit per year.
- Thermopack of 40 Kcal capacity is also being converted in Husk fired for utilizing alternate source of energy.

(iii) The Capital investment on energy conservation equipment:

- Total Capital Investment on Energy Conservation measures is around 71.25 Lakhs for year 2021-22.

B. Technology absorption

BSL focuses on new products, processes and catalyst development to support existing business and create breakthrough technologies for new businesses.

(i) The efforts made by the Company towards technology absorption during the year under review are:

- Installed Inverter drives on supply and return air fans of humidification plants of PV Spinning TFO for better control of humidity and temperature in the department. This measure also saved around 390 units/day.
- Adopted continuous compressed air leakage arresting program in all divisions.
- Installed inverter driven Compressor in Spinning to overcome pressure variation and wastage of power due to unloading of compressors.
- New Generation Ring Frames and speed frames replaced in PV spinning for better and quality production.
- Installed polymaster attachment on existing Vortex Spinning machines to run 100% polyester other than Viscos .
- Installed new generation fogging system in spinning packing for better conditioning of Yarn.
- Management has planned to expand their product mix by introducing new compact cotton Spinning mill of capacity 29184.
- In the area of ETP , 2 nos pump stopped after converting into gravity system.

(ii) The benefits derived like product improvement, cost reduction, product development or import substitution:

- Replacement of R/Frame and Speed Frame machines will improve the yarn quality and quantity.
- Around 1.32 Lakh unit saved by different energy conservation measures adopted in Spinning, Weaving and Process.
- Continuous drive of air leakage arresting improved the working of compressors and reduced the power consumption also.
- New cotton Spinning will lead to product improvement and new product mix will add in our product range.
- Boiler replacement and to run it on alternate source of energy is the major step on energy conservation.

INDEPENDENT AUDITORS' REPORT

To,
The Members,
BSL Limited,

Opinion

We have audited the accompanying Standalone Financial Statements of **BSL LIMITED ("the Company")**, which comprise the Balance Sheet as at 31st March 2022, and the Statement of Profit and Loss (including Other Comprehensive Income), Statement of Cash Flow and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information (hereinafter referred to as 'Standalone Financial Statements')

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended ('Ind AS') and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2022, and the profit and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the Standalone Financial Statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the standalone financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined the matters described below to be the key audit matters to be communicated in our report.

Key Audit Matter	Auditor's Response
The company is having substantial turnover in foreign currency. It hedges currency fluctuations through forward booking or taking PCFC. Similarly imports are also hedged through forward booking. The company follows Ind AS – 109 for accounting of hedging transactions.	<p>Principal Audit Procedures</p> <p>Our audit approach and procedures were combination of test of internal controls and substantive procedures which included the following:</p> <ul style="list-style-type: none"> • Obtained an undertaking of management's process and evaluated design and tested operating effectiveness of controls related to forward booking and taking PCFC • Assessed the appropriateness of the methodology used by the management for forward booking and taking PCFC credit • Assessed the professional competence of the person engaged by management in foreign currency matters • Assessed the reasonableness of assumptions in forward booking • Based on our procedures, we also considered the adequacy of disclosures and compliance of Ind AS in standalone financial statements.

Information other than the financial statements and auditors' report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the Standalone Financial Statements and our auditors' report thereon.

Our opinion on the Standalone Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Standalone Financial Statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

INDEPENDENT AUDITORS' REPORT

Responsibility of Management for Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Indian Accounting Standards ("Ind AS") and other accounting principles generally accepted in India, including the Accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the Annexure-I a statement on the matters specified in paragraphs 3 and 4 of the Order.

2. As required by Section 143(3) of the Act, we report that:

- a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
- b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
- c) The Balance Sheet, the Statement of Profit and Loss including the Statement of Other Comprehensive Income, the Statement of Cash Flow and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
- d) In our opinion, the aforesaid standalone financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with the Companies (Accounts) Rules, 2015, as amended.

ANNEXURE II TO AUDITOR'S REPORT

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

Opinion

We have audited the internal financial controls over financial reporting of **BSL Limited, Bhilwara** ("the Company") as of March 31, 2022 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022, based on the criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by

ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting

included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

- 1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- 2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and the receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- 3) Provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes to financial statements as at and for the year ended 31st March, 2022**1. Company Overview and Accounting Policies****A. Corporate Information**

BSL Limited ("the Company") is a public Limited company incorporated and domiciled in India and has its registered office at 26, Industrial Area, Gandhi Nagar, Bhilwara, Rajasthan. The Company has its primary listing on the BSE Limited and National Stock Exchange in India.

The Company's operation predominantly relates to Textile & Generation of Wind Power. BSL is one of the India's largest vertically integrated textile company and leading manufacturers of Poly Viscose, Worsted, Fashion Fabrics and Yarns in India.

B. Significant Accounting Policies**I. Statement of Compliance**

The financial statements are prepared in accordance with Indian Accounting Standards (Ind AS), as prescribed under section 133 of the Companies Act, 2013("the Act") read with the Rule 3 of the Companies (Indian Accounting Standard) Rules 2015 as amended from time to time and guidelines issued by the Securities and Exchange Board of India (SEBI).

II. Basis of preparation and presentation

The financial statements are prepared on the historical cost basis except for following financial instruments that are measured at fair value:

- Defined benefit plan- Plan assets measured at fair value,
- Certain financial assets and liabilities measured at fair value (including derivative instruments).

➤ **Functional and Presentation Currency**

The financial statements are presented in Indian Rupees, which is the functional currency of the Company and the currency of the primary economic environment in which the Company operates.

➤ **Classification of Assets and Liabilities as Current and Non-Current**

All assets & liabilities are classified as current or non-current as per the Company's normal operating cycle and other criteria set out in Schedule III of the Companies Act, 2013. Based on the nature of products/activities of the Company and the normal time between acquisition of assets for processing and their realization in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

Assets are classified as current when any of following criteria is satisfied:

- i. The Company expects to realize the asset, or intends to sell or consume it, in its normal operating cycle;
- ii. The Company holds the asset primarily for the purpose of trading;
- iii. The Company expects to realize the asset within twelve months after the reporting period;
- iv. The asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

Liabilities are classified as current when any of following criteria is satisfied:

- i. The Company expects to settle the liability in its normal operating cycle;
- ii. The Company holds the liability primarily for the purpose of trading;
- iii. The liability is due to be settled within twelve months after the reporting period; or
- iv. The Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

III. Revenue recognition

The company mainly deals in textiles and derives revenues primarily from sale of manufactured goods, traded goods and related services. The company is also engaged in generation of power through wind mill.

Revenue from sale of products and services are recognized at a time on which the performance obligation is satisfied, at an amount that reflects the consideration the company expects to receive in exchange for those products and services. The period over which revenue is recognized is based on entity's right to payment for performance completed.

Other Operating revenue

- a) Export incentives are accounted for in the year of export.
- b) Interest on bank deposits is recognized on the effective interest rate method basis taking into account the amounts invested and the rate of interest applicable.
- c) Interest from trade receivables and other financial assets are recognized when it is probable that the economic benefit will flow to the entity and the amount can be measured reliably.
- d) Claim lodged with insurance companies is recognized as income on acceptance by the insurance Companies.

IV. Government Grant & Government Assistance

Government grants are not recognised until there is reasonable assurance that the Company will comply with the conditions attaching to them and that the grants will be received.

Government grant/subsidy if relates to an expense item are recognised in the statement of profit and loss on a systematic basis over the periods in which the Company recognise as expenses the related costs for which the grants are intended to compensate.

The Capital Subsidy under Technology Up-gradation Fund Scheme (TUFS) from Government on specified machinery is recognized on a systematic and rational basis by adopting Deferred Income Approach. Such allocation to income is done prospectively over the remaining useful life of the respective assets and is adjusted against the depreciation in the Statement of Profit and Loss. Pending the utilization of the grant received, the same is presented as 'Deferred Income'.

If the grant/subsidy is related to subvention of a particular expense, it is deducted from that expense in the year of recognition of government grant/ subsidy.

V. Inventories

Inventories including goods-in-transit are valued at lower of cost and estimated net realizable value. Cost of inventory includes the cost of purchase& GST paid on inputs and all other direct and indirect cost allocated proportionately incurred in bringing the inventories to their present location and condition.

Raw materials and stores & spares:

Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on FIFO basis in case of raw material and on weighted average basis in case of stores & spares. Waste material is valued at net realizable value.

Finished goods and work in progress:

Cost includes cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity but excluding borrowing costs. Cost is determined on weighted average cost basis.

Traded goods:

Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on FIFO basis.

Waste:

Valued at net realizable value

Goods on Job work:

Processed value of goods on job basis is valued at contract rate.

Notes to financial statements as at and for the year ended 31st March, 2022**VI. Property, Plant and Equipment (PPE)****Recognition and measurement**

Property, plant and equipment (PPE) are carried at cost less accumulated depreciation and accumulated impairment losses, if any.

The cost of property, plant and equipment (PPE) comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses, present value of decommissioning costs (where there is a legal or constructive obligation to decommission) and interest on borrowings attributable to acquisition of qualifying assets up to the date the asset is ready for its intended use.

Subsequent expenditure

Subsequent expenditure on property plant & equipment after its purchase / completion is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

Impairment

Property, plant and equipment are tested for impairment whenever events or changes in circumstances indicate that an asset may be impaired. If an impairment loss is determined, the remaining useful life of the asset is also subject to adjustment.

An impairment loss is recognized in the statement of profit and loss to the extent, asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets.

The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

Capital work-in-progress

Projects under which property, plant and equipment are not yet ready for their intended use are carried at cost less any recognised impairment loss. Cost comprises direct cost, related incidental expenses and borrowing cost.

Depreciation

Depreciation is recognised for property, plant and equipment so as to write-off the cost less residual values over their estimated useful lives. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis taking into account commercial and technological obsolescence as well as normal wear and tear.

Depreciation on tangible assets is provided on straight line method over the useful lives prescribed under Schedule II of Companies Act, 2013

Free hold land is not depreciated.

Depreciation on additions to or on disposal of property, plant and equipment is calculated on pro-rata basis i.e. from (up to) the date on which the Property, Plant and Equipment is available for use (disposed off).

Derecognition of PPE

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the property, plant and equipment) is included in the statement of profit & loss when the property, plant and equipment is derecognized.

VII. Intangible assets**Recognition and measurement**

An intangible asset is recognized when it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity; and the cost of the asset can be measured reliably. All other expenditure is expensed as incurred.

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses.

Notes to financial statements as at and for the year ended 31st March, 2022

The cost of a separately acquired intangible asset comprises of its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; and any directly attributable cost of preparing the asset for its intended use.

Internally generated intangibles, excluding capitalized development costs, are not capitalized and the related expenditure is reflected in statement of profit or loss in the period in which the expenditure is incurred.

Amortisation

The useful lives of intangible assets are assessed as either finite or infinite. The amortization period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates.

Impairment

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization expense on intangible assets with finite lives is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit level.

The estimated useful life of the finite intangible assets is given below:

S.No.	Nature of Assets	Effective Useful Life	Amortisation Method
1.	Computer Software	6 Years	Amortised on Straight line basis over the useful life.

Derecognition of Intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from Derecognition of an intangible asset are determined as the difference between the net disposal proceeds and the carrying amount of the asset and recognised in Statement of profit and loss when the asset is derecognised.

VIII. Foreign currencies

The Company's financial statements are presented in INR. (₹)

Transactions and balances

In preparing the financial statements, transactions in foreign currencies are recognised at the rates of exchange prevailing at the dates of the transactions. Exchange differences arising on foreign exchange transactions settled during the period are recognised in the Statement of profit and loss of the period.

At the end of each reporting period, monetary items denominated in foreign currencies (except financial instruments designated as Hedge Instruments) are translated at the rates prevailing at that date.

Exchange differences on translation of monetary items are recognised in Statement of profit and loss in the period in which they arise with the exception of the following:

Monetary items that are designated as part of cash flow hedge instrument are recognised in other comprehensive income.

Non-monetary that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

Derivative Financial Instruments and Hedge Accounting

The Company uses derivative instruments i.e. forward contracts to hedge its foreign currency risks. The Company designates these forward contracts as cash flow hedges to mitigate the risk of foreign exchange exposure on highly probable forecast cash transactions. The Company has designated forward instruments on spot to spot basis. The Company recognises the forward points in the statement of profit and loss account.

At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Company documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk.

Notes to financial statements as at and for the year ended 31st March, 2022

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivatives is recognised in other comprehensive income and accumulated in the other comprehensive income under other equity. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in the statement of profit and loss. If the hedging instrument no longer meets the criteria for hedge accounting, then hedge accounting is discontinued prospectively. If the hedging instrument expires or is sold, terminated or exercised, the cumulative gain or loss on the hedging instrument recognised in other comprehensive income till the period hedge was effective remains in other comprehensive income until the forecasted transaction occurs. The cumulative gain or loss previously recognised in the other comprehensive income is transferred to the statement of profit and loss upon the occurrence of related forecasted transaction. If the forecasted transactions no longer expected to occur, then the amount accumulated in other comprehensive income is reclassified to net profit in the statement of profit and loss.

IX. Employee benefits**Short-term Employee Benefits**

Short-term employee benefits obligation is measured on undiscounted basis and is expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Defined Contribution Plan:

The Company makes defined contribution to Employees Provident Fund Organization (EPFO), Pension Fund, Superannuation Fund and Employees State Insurance (ESI), which are accounted on accrual basis as expenses in the statement of profit and loss in the period during which the related services are rendered by employees.

Prepaid contribution is recognized as assets to the extent that a cash refund or reduction in future payments is available.

Defined Benefit Plan:

The Company's liabilities on account of gratuity and earned leave on retirement of employees are determined under defined benefit plans.

The Company's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. In order to calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Remeasurement of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in Other Comprehensive Income. Net interest expense (income) on the net defined liability (assets) is computed by applying the discount rate, used to measure the net defined liability (asset), to the net defined liability (asset) at the start of the financial year after taking into account any changes as a result of contribution and benefit payments during the year.

Net interest expense and other expenses related to defined benefit plans are recognized in statement of profit and loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in statement of profit and loss. The Company recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

X. Taxation

Income tax expense represents the sum of tax currently payable and deferred tax.

➤ Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible.

Notes to financial statements as at and for the year ended 31st March, 2022

Current tax is determined on the basis of taxable income and tax credits computed for Company, in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdiction where the Company operates. The tax rates and tax laws used to compute the amount are those that are enacted at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income (OCI) or in equity). Current tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction and where the relevant taxpaying units intends to settle the asset and liability on a net basis.

➤ **Deferred tax**

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax base used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability will be settled or the asset will be realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the relevant entity intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax for the year

Current and deferred tax are recognized in statement of profit and loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

XI. Provisions, Contingent Liabilities

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognized as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

Contingent Liability is disclosed after careful evaluation of facts, uncertainties and possibility of reimbursement, unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent liabilities are not recognized but are disclosed in notes.

Contingent assets are not recognized. However, when the realization of income is virtually certain, then the related asset is no longer a contingent asset, but it is recognized as an asset.

XII. Segment reporting

The Board of Directors of the Company identified Textiles as primary business segment as the company mainly dealing in Textile business only

Notes to financial statements as at and for the year ended 31st March, 2022

Further the board has identified two geographical segments i.e. 'Domestic' and 'Export' considering the political and economic environment. Type A customers, assets employed and risk parameters associated in respect of each of the geographical area.

XIII. Earnings per share

Basic earnings per share are computed by dividing the profit/loss for the year attributable to the shareholders of the Company by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit/loss for the year attributable to the shareholders of the Company as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

XIV. Statement of Cash flow

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

XV. Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of the assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

All other borrowing costs are recognised in statement of profit and loss in the period in which they are incurred.

XVI. Non-Current assets(or disposal groups) held for sale and discontinued operations

Non-Current assets (or disposal groups) are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less cost to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and contractual rights under insurance contracts, which are specifically exempt from this requirement.

An impairment loss is recognised for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell. A gain is recognised for any subsequent increase in fair value less cost to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognised. Again or loss not previously recognised by the date of the sale of the non-current asset (or disposal group) is recognised at the date of de-recognition.

Non-current assets (including those that are part of disposal group) are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognised.

Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the balance sheet. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the balance sheet.

A discontinued operation is a component of the entity that has been disposed of or classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single co-ordinated plan to dispose of such a line of business or area of operations or is a subsidiary acquired exclusively with a view to sale. The result of discontinued operations are presented separately in the statement of profit and loss.

XVII. Fair Value Measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in most advantageous market for the asset or liability and the Company has access to the principal or the most advantageous market.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets & liabilities on the basis of the nature, characteristics and the risks of the asset or liability and the level of the fair value hierarchy as explained above. This note summarizes accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

XVIII. Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

For the purposes of the presentation of cash flow statement, cash and cash equivalents include cash on hand, in banks and demand deposits with banks, net of outstanding bank overdrafts that are repayable on demand, book overdraft as they being considered as integral part of the Company's cash management system.

XIX. Financial instruments

Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss (FVTPL) are recognized immediately in the statement of profit and loss.

Notes to financial statements as at and for the year ended 31st March, 2022**Financial assets**

For purposes of subsequent measurement, financial assets are classified in below mentioned categories:

- Financial assets carried at amortized cost.
- Financial asset at fair value through other comprehensive income.
- Financial asset at fair value through profit or loss.

Financial assets at amortized cost

Financial assets are subsequently measured at amortized cost using the effective interest method if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income

Financial assets are measured at fair value through other comprehensive income (OCI) if these financial assets are held within a business model whose objective is achieved by both selling financial assets and collecting contractual cash flows, the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition, the Company makes an irrevocable election on an instrument-by-instrument basis to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments, other than equity investment which are held for trading. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to the statement of profit and loss on disposal of the investments. So far, the Company has not elected to present subsequent changes in fair value of any investment in OCI.

Financial assets at fair value through profit or loss ('FVTPL')

Investment in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investment in equity instruments which are not held for trading.

Other financial assets are measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognized in Statement of profit or loss.

Impairment of financial assets (other than at fair value)

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses.

However, for trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses. In cases where the amounts are expected to be realized up to one year from the date of the invoice, loss for the time value of money is not recognized, since the same is not considered to be material.

Derecognition of financial assets

The Company derecognized a financial asset when the contractual right to the cash flow from the asset expires or when it transfers the financial asset and substantially all risk and reward of ownership of the asset to other party. If the Company neither transfers nor retains substantially all the risk and reward of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associate liability for an amount it has to pay. If the Company retains substantially all the risks and reward of ownership of a transferred financial asset, the company continues to recognize the financial asset and also a collateralized borrowing for the proceeds received.

Financial liabilities

All financial liabilities are subsequently measured at amortized cost using the effective interest method.

Classification as debt or equity

Debt and equity instruments issued by a Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its liabilities. Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate (EIR) method. Gains and losses are recognized in the statement of profit or loss when the liabilities are derecognized as well as through the effective interest rate (EIR) amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

Trade and other Payables

These amounts represent liabilities for goods & services provided to the Company prior to the end of the financial year which are unpaid. These are recognized initially at fair value and subsequently measured at amortized cost using effective interest method. Where the maturity period is within one year from balance sheet date, the carrying amount approximates the fair value at initial recognition due to short maturity of these instruments.

Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in the statement of profit and loss.

Reclassification of financial assets and financial liabilities

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognized gains, losses (including impairment gains or losses) or interest.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

XX. Impairment of Non-Financial assets

The non-financial assets, other than biological assets, inventories and deferred tax asset are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indications exist, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment.

For impairment testing, assets that do not generate independent cash inflows are grouped together into cash generating units (CGUs). Each CGU represents the smallest group of assets that generate cash inflows that are largely independent of the cash inflows of other assets or CGUs.

Goodwill arising from the business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

The recoverable amount of the CGU (or an individual asset) is the higher of its value in use and its fair value less cost to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the CGU (or the asset).

Notes to financial statements as at and for the year ended 31st March, 2022

The corporate assets (e.g. central office building for providing support to various CGUs) do not generate independent cash inflows. To determine impairment of a corporate asset, recoverable amount is determined for the CGUs to which the corporate asset belongs.

The impairment loss is recognized if the carrying amount of the asset or the CGU exceeds its estimated recoverable amount. Impairment losses are recognized in the statement of profit & loss. Impairment loss recognized in respect of CGU is allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amount of the CGU (or group of CGUs) on a pro rata basis.

An impairment loss in respect of goodwill is not subsequently reversed. In respect of other assets for which impairment loss has been recognized in prior periods, the company reviews at each reporting date whether there is any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

XXI. Use of estimates

The preparation of the financial statement in conformity with Ind AS requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognized in the periods in which the results are known / materialize.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and current and / or future periods are affected.

XXII. Critical accounting judgments and key sources of estimation uncertainty

The preparation of the Company's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities.

➤ **Critical accounting judgments in applying accounting policies**

The following are the critical judgments, apart from those involving estimations that the Management have made in the process of applying the Company's accounting policies and that have most significant effect on the amounts recognised in the financial statements.

Defined benefit plans (gratuity benefits)

The cost of the defined benefit gratuity plan and other post-employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate; future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. (Refer Note XVII)

Impairment of non-financial assets

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgment in making assumption and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward estimate at the end of each reporting period.

Assets Held for sale

Management Judgment is required for identifying the assets which are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset and its sale is highly probable which could lead to significant judgment. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Income taxes

Management judgment is required for the calculation of provision for income taxes and deferred tax assets and liabilities. The Company reviews at each balance sheet date the carrying amount of deferred tax assets. The factors used in estimates may differ from actual outcome which could lead to significant adjustment to the amounts reported in the financial statements.

Contingencies

Management judgment is required for estimating the possible outflow of resources, if any, in respect of contingencies/ claim/ litigations against the Company as it is not possible to predict the outcome of pending matters with accuracy.

Insurance claims

Insurance claims are recognized when the Company has reasonable certainty of recovery. Subsequently any change in recoverability is provided for.

XXIII. Key Source of estimation uncertainty

Key source of estimation uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of impairment of investments, provisions and contingent liabilities.

The areas involving critical estimates are:

Useful lives and residual values of property, plant and equipment

Useful life and residual value of property, plant and equipment are based on management's estimate of the expected life and residual value of those assets and is as per schedule II to the Companies Act 2013. These estimates are reviewed at the end of each reporting period. Any reassessment of these may result in change in depreciation expense for future years (Refer note no VI).

Impairment of property plant and equipment

The recoverable amount of the assets has been determined on the basis of their value in use. For estimating the value in use, it is necessary to project the future cash flow of assets over its estimated useful life. If the recoverable amount is less than its carrying amount, the impairment loss is accounted for in statement of profit and loss. (Refer note VI)

Valuation of deferred tax assets

Deferred tax assets are recognized only to the extent it is considered probable that those assets will be recoverable. This involves an assessment of when those deferred tax assets are likely to reverse and a judgment as to whether or not there will be sufficient taxable profits available to offset the tax assets when they do reverse. The Company reviews the carrying amount of deferred tax assets at the end of each reporting period. Any change in the estimates of future taxable income may impact the recoverability of deferred tax assets (Refer note X).

Provisions and contingencies

A provision is recognized when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes. Contingent assets are not recognized but disclosed in the financial statements wherever applicable. (Refer note XI)

(B) Fair value hierarchy

- Level 1 : Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 : Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 : Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

Notes to financial statements as at and for the year ended 31st March, 2022

The following table presents fair value hierarchy of assets and liabilities measured at fair value on a recurring basis as of 31st March, 2021:

Particulars	Fair Value Measurement	As at March 31, 2022	As at March 31, 2021
Forward currency contract	Level 2	0.63	69.24

Valuation Technique used to determine Fair Value

The Company maintains policies and procedures to value financial assets or financial liabilities using the best and most relevant data available. The fair values of the financial assets and liabilities are included at the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following methods and assumptions were used to estimate the fair values:

- 1) Fair value of cash and deposits, trade receivables, trade payables, and other current financial assets and liabilities measured at amortized cost is approximate to their carrying amounts largely due to the short-term maturities of these instruments. The fair value of other non-current financial assets and liabilities (security deposit taken/given and advance to employees) carried at amortized cost is approximately equal to fair value. Hence carrying value and fair value is taken same.
- 2) Long-term variable-rate borrowings measured at amortized cost are evaluated by the Company based on parameters such as interest rates, specific country risk factors, credit risk and other risk characteristics. Fair value of variable interest rate borrowings approximates their carrying values. Risk of other factors for the company is considered to be insignificant in valuation.
- 3) The fair values of the forward contract are determined using the forward exchange rate at the balance sheet date based on quotes from banks and financial institutions. Management has evaluated the credit and non-performance risks associated with its derivative counterparties and believe them to be insignificant and not warranting a credit adjustment.

(C) FINANCIAL RISK MANAGEMENT OBJECTIVES & POLICIES

The Company's principal financial liabilities comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include loans, trade and other receivables, and cash and cash equivalents that derive directly from its operations.

The company's activities expose it to a variety of financial risks: currency risk, interest rate risk credit risk and liquidity risk. The company's overall risk management strategy seeks to minimize adverse effects from the unpredictability of financial markets on the company's financial performance. The Company's senior management is supported by a financial risk committee that advises on financial risks and the appropriate financial risk governance framework for the Company. The financial risk committee provides assurance to the Company's senior management the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Audit committee reviews and agrees policies for managing each of these risks, which are summarized below.

(D) FOREIGN CURRENCY RISK MANAGEMENT

Foreign exchange risk is the risk that the fair value of future cash flows of financial instruments will fluctuate because of changes in foreign exchange rate. The Company derives significant portion of its revenue in foreign currency, exposing it to fluctuations in currency movements. The Company has laid down a foreign exchange risk policy as per which senior management team reviews and manages the foreign exchange risks in a systematic manner, including regular monitoring of exposures, proper advice from market experts, hedging of exposures, etc.

The Company uses derivative financial instruments, such as foreign exchange forward contracts, to mitigate foreign exchange related risk exposures. Derivative financial instruments relating to a firm commitment or a highly probable forecast transaction are marked to market at every reporting date. In management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk because the exposure at the end of the reporting period does not reflect the exposure during the year.

The Following significant exchange rates have been applied at year end:-

Spot Rate (INR)	As at 31.03.2022	As at 31.03.2021
USD	75.71	73.11
EURO	84.49	85.73

Notes to financial statements as at and for the year ended 31st March, 2022**Interest Rate Risk Management**

The company is exposed to interest rate risk because it borrows funds at both fixed and floating interest rates. The risk is managed by the company by maintaining an appropriate mix between fixed and floating rate borrowings. The company's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.

Interest Rate Sensitivity Analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease represents management's assessment of the reasonably possible change in interest rates.

Other Price Risks

The company is not exposed to any instrument which has price risks arising from equity investments which is not material.

Credit Risk Management

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company's exposure to credit risk primarily arises from trade receivables, balances with banks, investments and security deposits. The credit risk on bank balances is limited because the counterparties are banks with good credit ratings.

Trade Receivables

Credit risk is managed through credit approvals, establishing credit limits, continuous monitoring of creditworthiness of customers to which the company grants credit terms in the normal course of business. The Company also assesses the financial reliability of customers taking into account the financial condition, current economic trends and historical bad debts and ageing of accounts receivables.

Cash & Cash Equivalent

With respect to credit risk arising from financial assets which comprise of cash and cash equivalents, the Company's risk exposure arises from the default of the counterparty, with a maximum exposure equal to the carrying amount of these financial assets at the reporting date. Since the counter party involved is a bank, Company considers the risks of non-performance by the counterparty as non-material.

Liquidity Risk Management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the company's short, medium, and long-term funding and liquidity management requirements. The company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

Liquidity and Interest risk tables

The following tables detail the company's remaining contractual maturity for its financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the company can be required to pay. The tables include both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the company may be required to pay.
